ABOUT Spons Coin

INTRODUCTION

INTRODUCTION

People are introducing new ideas in the world of cryptocurrencies. The popularity of digital currencies is increasing very rapidly. In the era of great competition, Spons Coin has introduced a unique idea. The Spons Coin is presenting a platform for streamers to implement a cryptocurrency donation processor where many other cryptos and the native currency of Spons Coin will be able to be donated.

Spons Coin will strive to provide utility for the token in many ways such as the Cryptocurrency donation platform/Nft Marketplace/Cx Crash Game and much more. An addition to the utility we will create for the token we have also implemented a Buyback feature on the smart contract which is able to automatically buyback the Cx token and burn it.

ABOUT Spons Coin

Spons Coin is a community-based and communitydriven token, guaranteeing complete transparency through every milestone of the project. Spons Coin is building a platform to allow streamers and content creators a safe and easy way of receiving donations with various cryptocurrencies including the native Spons Coin token. The project is founded by Paul Denino or also known as Ice Poseidon with the intention to provide a fast, secure and easy way for

streamers to receive crypto donations and boost their overall revenue from their content. This being said, Spons Coin aims to deliver other projects such as its own NFT Marketplace where all the generated proceedings will be used to buy back the token and be burned.

The Spons Coin Crash game is another project which will be established under the Spons Coin ecosystem which will provide the gambling experience with no house edge, the project will in turn generate fees in the network which will be used to buyback the token via its Smart contract.

The basic principles of the smart contract that Spons Coin is run are:

Reflection: All holders will be able to receive 2% of the fees generated from the

token just from holding the Spons Coin or also known as auto staking

Automatic Buybacks: The Spons Coin smart contract will receive 6% of the fees generated from the token to be used in Buybacks of the token, insuring a price stability to the token.

Marketing Wallet: 3% of all fees generated will be contributed to the Marketing

wallet which in turn will be used to fund marketing campaigns in the Cryptocurrency market.
